

**State Project No. 713-59-0213**  
**Boggy Branch Bridge**  
**Washington Parish**  
**(Estimated Construction Cost: \$338,582.75)**

The existing structure is functionally obsolete and is load posted at 5 tons. The roadway serves a good deal of parish people accessing LA 21. A new structure could support the logging industry.

The proposed replacement structure will assist small contractors to meet equipment loans and payroll overhead costs.
